

Rare Info, Ideas & Community Groups

There are Simple Solutions to our Problems, which could bring Much More Efficiency and Joy!

▶ Something for Everyone! ▶ Free papers.

- ▶ These websites or papers contain suppressed information that is rarely seen.
- ▶ They have information which is easy to read that is summarised with references proving these facts.
- ▶ They have the solutions, but some also warn us of the dangers.
- ▶ They have a wide variety of totally different sites, so there is something for everybody.

The separate papers and groups include:

- ▶ Community groups, rare info & solutions to help people. Help search for extraordinary people, ideas, products and inventions that are significantly better than those widely known or available. Many superior inventions and discoveries have been suppressed. The letter also summarises much of the below.
- ▶ A society to help inventors. We need to find or form a data base of honest manufacturers, investors and distributors that could help inventors.
- ▶ Test your memory. Do diets, prayers or training techniques work? Are you developing dementia or Alzheimer's disease? The aim is to find what can noticeably improve our memory.
- ▶ A weather organization to record and share data, improve forecasting and increase available information. Local weather records are automatically graphed on the internet. One aim is to provide people with weather instruments so that records in more areas can be obtained.
- ▶ New ideas to restore democracy and prosperity to the country. Innovative win-win ideas and policies not often thought of, that can solve our problems. Solutions to help the economy, environment, poverty and much more. An alliance of quality independent candidates that agree on good core issues could be formed where the candidates could still have their own policies to serve their electorate.
- ▶ True conspiracies and solutions on how to avoid them. A plan for a better system that is more efficient and enjoyable.
- ▶ A group to search for people who can produce the evidence that they are supernaturally led by God in practical ways, and that their prayers make a noticeable difference. If we could find them, they could help us, pray for us and lead us to the truth. Then we could more affectively serve God and assist people.

Also information on: True Christianity; Suppressed truths which are vital to know and are not taught in churches; Ways to bring revival; Prophecy; Widespread deceptions.

▶ Many practical inventions that save time and money and have huge advantages over competing systems. They include:

- * Water saving irrigation sensors.
- * Super light tents with a unique heat retaining option.
- * Backpack and seat frames that cool ones back.
- * Weather instruments.
- * Simple low cost spirit level surveying tools.
- * Rapid tab index systems that attach to existing books.
- ▶ Information on Tolga in North Queensland, Australia. - a picturesque area.
- ▶ Short autobiography.
